STANDARD OPTIONS	56-57
OPTIONAL EXTRAS	58-59

THE PROCESS

1. YOUR CHOICE OF BASE VEHICLE

There are plenty of vehicles suitable for your overland adventures, and Motorcraft is here to help. While we do not actively sell vehicles, we can assist you in sourcing the perfect one to match your lifestyle and requirements. Additionally, our team is happy to advise on which vehicles are best suited for your specific needs, ensuring you start your build with the ideal foundation for your journey.

2. HABITATION BODY SIZE

Now that you've identified the ideal base vehicle for your adventure, it's time to select one of Motorcraft's layouts that's best suited to your vehicle choice and your needs. With a variety of sizes and layouts available, you can create the perfect living space for your overland adventures.

3. CUSTOMISATION AND OPTIONAL EXTRAS

You have the option to select your cupboard colours and soft furnishings. Additionally, we offer a range of optional extras to further customise your truck to suit your preferences.

4. DELIVERY

We offer worldwide shipping for all of our products. For those interested in having their habitation kit professionally mounted, you may bring your vehicle to our facility for a nominal fee, and drive away with your new habitation box securely installed.

5. FIT OUT AND PERSONALISATION

With your new Trekkon habitation body mounted, you're ready to begin installing your exterior components a. This is your opportunity to truly make the truck your own, incorporating personalised features and styling to reflect your individual taste and lifestyle.

COMPLETED HABITATION UNITS

READY FOR YOUR ADVENTURE

The Trekkon range is a series of customisable, pre-defined layouts designed to give you the overland vehicle you've always wanted — without the cost or delays of a full bespoke build.

By streamlining the design and manufacturing process, we deliver premium, expedition-ready solutions at a fraction of the price.

Each layout has been carefully developed to maximise space, durability and functionality, giving you the freedom to choose a configuration that suits your needs perfectly. It's the smart way to build a serious overland truck — expertly engineered, ready to go, and remarkably affordable

Disclaimer: All products shown are subject to change without prior notice. Specifications, features, and availability may be updated to reflect improvements or adjustments.

EXPERIENCE YOU CAN RELY ON

Our Trekkon modules are built upon decades of experience in crafting rugged overland vehicles, combined with the skill and precision of our in-house team. Designed and manufactured by Motorcraft, each Trekkon unit reflects our commitment to long-term reliability and performance from the very first journey. Every module includes the following Motorcraft-engineered components

HABITATION BODY & SUBFRAME

Our habitation boxes are built using Motorcraft's own aluminium cappings, designed from the ground up for expedition use. A resin-based thermal break between inner and outer layers ensures excellent insulation in extreme cold, keeping you warm and dry wherever you roam.

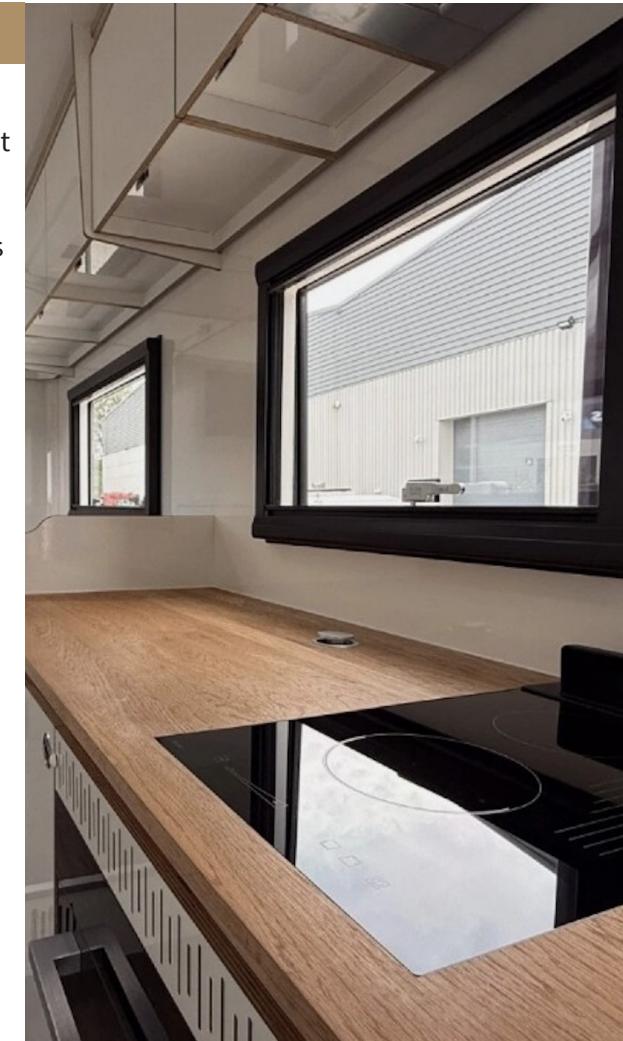

In hotter climates, high-performance insulation and gloss white roof panels help reflect heat, keeping the interior cool. Completing the system is our kinetic subframe, tailored to your chosen chassis — two rails fixed rigidly at one end and mounted with spring bolts at the other to allow controlled movement.

WINDOWS, DOORS & HATCHES

Our windows are designed to suit your chosen layout, making the most of interior space while maximising light and storage. The result is a bright, practical living area that feels like home. All are double-glazed, toughened, and built for durability, security, and excellent insulation — expertly crafted for vehicle living.

They pair perfectly with the Motorcraft entrance door, which offers the same high standards of thermal efficiency and strength. Featuring a stainless steel hinge, five-point lock, and anti-pry reinforcement, it's built for any adventure.

Completing the set, our reinforced GRP access hatch matches the door and windows in both style and rugged performance.

THE QUALITY YOU DESERVE

Whether you are looking for a 3.5m or a 7.5m habitation body, Motorcraft have simplified the choice for you with the Trekkon range.

SEATING

Depending on the body length and your chosen layout, you'll have either a fixed bed positioned above garage storage or a height-adjustable bed that raises and lowers over the seating area. Both options are complemented by practical overhead cupboards, providing valuable storage without compromising space.

Larger body sizes can also accommodate bunk beds — a perfect solution for families or those who enjoy travelling with friends. Additionally, several layouts offer the flexibility to convert the main seating area into an occasional guest bed, ensuring you're always ready for company, planned or unexpected.

KITCHEN

Isotherm CR 320, CR130, CRO200 Fridge Freezer, depending on layout/ body length.

Bamboo counter top, domino AEG induction hob, stainless steel sink with single hot and cold faucet and counter space.

Base units with an integrated AEG Electric oven. In the 6.8m and 7m bodies, there is also an integrated wine cooler, while the 7.5m option offers a pull out pantry.

Overhead Cupboards, with integrated extractor fan.

All cabinets are designed and manufactured by our master craftsmen from the finest quality birchwood ply

that is faced with a hard wearing finish, according to your chosen colour palette.

All ironmongery is stainless steel. Ensuring the interior is capable of withstanding the forces of extreme off-roading.

Motorcraft
Adventure Developments

EXPERIENCE YOU CAN RELY ON

Our Trekkon modules are built upon decades of experience in crafting rugged overland vehicles, combined with the skill and precision of our in-house team. Designed and manufactured by Motorcraft, each Trekkon unit reflects our commitment to long-term reliability and performance from the very first journey.

SHOWER AND TOILET

With the exception of the 6.3m and 6.5m models, which feature separate toilet and shower rooms, all layouts include a combined shower and toilet space. Each is fitted with a high-quality separator (composting) toilet and a heated towel rail as standard.

Our bespoke white GRP shower trays, designed and manufactured in-house by Motorcraft, are paired with a durable bamboo shower board for a refined yet practical finish. A matching white GRP sink, complete with hot/cold mixer tap and under-sink storage cabinet, offers both style and function.

To complete the experience, a rainfall shower head provides comfort and convenience for life on the road.

HEATING SYSTEM

Experience unparalleled comfort with the Wallas Spartan Water Heater — a state-of-the-art diesel-powered system delivering efficient, silent, and reliable heating wherever your journey takes you. Boasting an impressive 90% efficiency through its condensing heat exchanger, the Spartan Water Heater ensures rapid and consistent warmth, whether you're heating domestic water or powering convector radiators for space heating. Its advanced Greenboost technology not only optimises fuel and electricity consumption but also supports renewable diesel (HVO), offering an eco-friendly solution without compromising performance. With features like remote activation via the Wallas App, high-altitude mode for optimal combustion in varying terrains, and a summertime setting for hot water without cabin heating, the Spartan Water Heater is engineered for adventurers who demand comfort, efficiency, and sustainability in every expedition.

ROBUSTNESS YOU'RE GOING TO NEED

Our systems are engineered to thrive in the toughest conditions on Earth — from frozen highlands to sweltering deserts. Every component is rigorously tested for off-road durability, long-term reliability, and global resilience. Wherever your journey takes you, Trekkon is built to go the distance.

ENERGY SYSTEMS

Every Trekkon unit comes equipped with a robust Victron Energy system as standard, featuring a powerful 10kWh LiFePO₄ battery bank, full battery management system (BMS), and a high-performance 5kW inverter. This setup delivers reliable, off-grid power for extended adventures, with seamless integration across your electrical systems.

Designed for serious overland travel, the system ensures stable energy supply for everything from heating and refrigeration to charging laptops and running tools. For those with greater demands, we offer flexible upgrade options to increase both storage capacity and inverter power — giving you the freedom to scale your setup to match your journey

WATER SYSTEMS

Our integrated water locker houses a fully insulated, all-season water management system, designed to keep your services protected and accessible no matter the climate.

At the heart of the system are two SL10 water filters housings, each fitted with advanced carbon nano filtration, ensuring clean, odour-free water wherever you are in the world.

By isolating all key water components — including filtration, pumps, and pipework — outside the living space, we deliver a solution that simplifies maintenance, enhances hygiene, and ensures reliable performance year-round.

DESIGNED TO SUIT YOU AND YOUR VEHICLE

Whether you're planning a solo expedition or travelling as a family, the Trekkon range offers a variety of pre-defined layouts tailored to suit different needs. From compact two-berth configurations with generous storage, to full-sized four-berth living spaces with fixed beds and separate wash rooms, each design maximises usability and comfort on the road

STANDARD OPTIONS

HABITATION BOX HANDING

Every box we build is available in both left-hand and right-hand configurations, ensuring a perfect fit for your vehicle and personal preferences. Whether you require a layout that complements your driving habits or one that maximizes space efficiency, our designs are tailored to suit your lifestyle needs.

LEFT HAND

RIGHT HAND

OPTIONAL EXTRAS

PERSONALISE YOUR VEHICLE

We manufacture a host of extras which you may wish to add to your kit to give it that personal touch. Just drop us an email for a tailored quote to your specifications.

Safari Hatch

Bring the outside in. We have two sizes to choose from.

Sky Hatch

Easy access to your roof whether it be maintenance or star gazing.

Sky light

Opens onto your roof, lets plenty of light in. Available in two sizes.

Storage Lockers

We can supply these in a handful of sizes to suit.

Kitchen Appliance

Add an washing machine, air fryer or a coffee machine

Victron Energy Kit

Upgrade your battery capacity or Inverter output

Solar Energy

Add solar panels to your electrical installation

Windows

Bring more light in with extra windows.

Charger capacity

Increase the rate you charge at with a high power alternator, generator or add a multi-voltage charger for global use.

Body Paint

Get your whole truck painted to match your body

Rear Lift

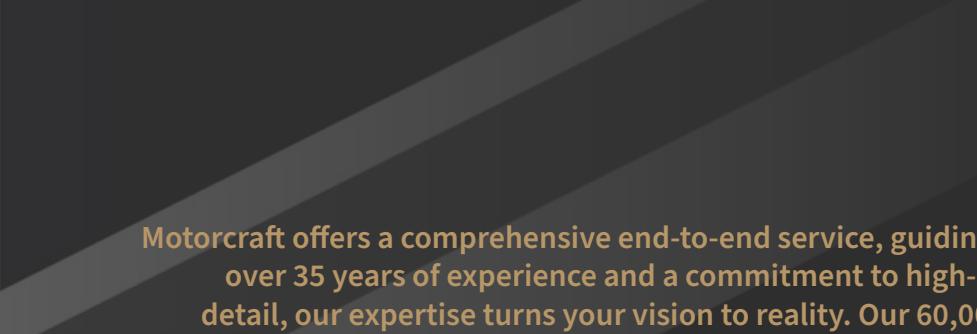

Add the ability to carry a motorbike or ATV on the back of your truck

Roof Rack

Get a custom made roof track for your truck

Brush Rails

Brush rails will help to protect your roof line against low hanging obstacle

Motorcraft offers a comprehensive end-to-end service, guiding you from project planning to delivery. With over 35 years of experience and a commitment to high-quality craftsmanship and attention to detail, our expertise turns your vision to reality. Our 60,000 square foot facility is more than just a production site; it is a hub of innovation, quality and craftsmanship that sets Motorcraft apart in the industry.

At Motorcraft, we pursue perfection relentlessly, ensuring that every product we deliver is one we stand behind wholeheartedly and our team would proudly use themselves. We thrive on innovation and demand the highest of standards from ourselves and our suppliers.

YOUR ADVENTURE OUR EXPERTISE.
